

Every young (actuarial) researcher should come to the 2023 PARTY !

Perspectives on Actuarial Risks in Talks of Young researchers

Winter School
VALHOTEL, Valencia, Spain
January 29th – February 3rd, 2023

This international Winter School is targeted at young researchers (PhD students and researchers, academics, practitioners within 5 years of PhD graduation) working on current actuarial science topics. This new edition aims to gather experts from different fields to answer the following question:

How can actuarial and risk management tools help in developing the United Nations Sustainable Development Goals (UN SDG)?

While the UN SDG are well-studied by economists, few actuaries are working on such topics. The Winter School aims to fill this gap by gathering actuarial academics from different fields on one side and practitioners aiming to develop the UN SDG on the other. Indeed, as actuaries are experts in the management of risks, they have developed tools in various disciplines that could be useful for many of the 17 SDG. Their tools and approaches need to be combined and adapted to this challenging field, forcing researchers to learn each other's languages to answer current questions related to the protection of the poor and the development of a sustainable society.

Young researchers across disciplines, such as actuarial science, demography, insurance, mathematics, statistics, epidemiology, biology and economics are encouraged to participate, present and freely discuss among each other their most relevant questions in their specific fields. Invited experts from academia and practice will be available for feedback (particularly in relation to how the presented research can help in reaching the SDG) and will provide opening and closing remarks.

Keynote speakers

Michael Adalla (UNITAR, Switzerland)*
Katrien Antonio (KU Leuven, Belgium)
Ana Maria Debón Aucejo (Uni Politècnica de València, Spain)
Ida Ferrara (York University, Canada)
Edward Furman (York University, Canada)
Stéphane Loisel (Université Lyon 1, France)
Sarah Mathieson (UNJSPF, USA)
Lisa Morgan (ILO, Switzerland)
Supriya Garikipati (University of Liverpool, UK)

*To be confirmed

Deadline for abstract submission: October 31st, 2022

For further details & registration: www.unil.ch/party

Organized by

University of Lausanne, CH
University of Liverpool, UK
Consortium of Excellence for
the 17 Goals, C-17

Organizing Committee

Séverine Arnold
Corina Constantinescu

Registration & hotel fee

CHF 400 (accommodation and meals included for 5 days)
